Statistical Release

Retail Interest Rates - October 2021

Key Developments in Loans

- The weighted average interest rate on new Irish mortgage agreements¹ was 2.73 per cent in October 2021, down 6 basis points on October 2020 (Table 1 & Chart 1). The average for the euro area stood at 1.28 per cent in October, although the rate varied considerably across countries (Chart 2).
- The weighted average interest rate on new fixed rate mortgage agreements was 2.61 per cent in October, a decrease of 6 basis points on October 2020. Fixed rate mortgages accounted for 83 per cent of new agreements over the month.
- For new variable rate mortgage agreements, the weighted average interest rate stood at 3.28 per cent in October. This was a decrease of 8 basis points on October 2020, however, volumes agreed remain quite volatile.
- The volume of new mortgage agreements amounted to €785 million in October 2021 (Chart 1). This represents an increase of 5 per cent on October 2020, and a 2 per cent decrease compared with September 2021.
- Renegotiated mortgages amounted to €354 million in October, an increase of 40 per cent on the previous year (Chart 3). The weighted average interest rate for all renegotiated mortgages was 2.56 per cent in October.
- New consumer lending agreements (including renegotiations) stood at €132 million in October 2021 (Chart 4); a decrease of €2 million on October 2020. The average interest rate on consumer loans was 7.49 per cent; the equivalent euro area rate stood at 5.24 per cent.

¹ Rates and volumes quoted on this page exclude renegotiations unless otherwise stated.

- Total NFC loan agreements were €1,519 million in October 2021, an increase of 61 per cent on October 2020 (Chart 5).
- There were €137 million in NFC loan agreements of up to
 €250k in September, which was €23 million (or 14 per cent) lower than in October 2020 (Chart 5). The weighted average interest rates on new NFC loans of up to €250k was 4.75 per cent. The equivalent euro area rate was 1.92 per cent.
- For new NFC loans of over €250k and up to €1 million, the volume of new lending amounted to €113 million in October, which was €11 million (or 11 per cent) higher than in October 2020. The weighted average interest rate stood at 3.11 per cent in October, with the equivalent euro area rate at 1.47 per cent.
- For new NFC loans of over €1 million, which represent the majority of new NFC loans, the volume of new lending amounted to €1,269 million in October, an increase of 87 per cent on October 2020. The weighted average interest rate stood at 3.00 per cent in October, compared to 1.17 per cent in the euro area.
- NFC overdrafts were 35 per cent higher in year-on-year terms in October, at €4,455 million². The weighted average interest rate stood at 3.92 per cent.

Key Developments in Deposits

- Interest rates on new household term deposits stood at 0.11 per cent in October. The equivalent euro area rate was 0.23 per cent.
- Interest rates on new NFC term deposits in Ireland stood at -0.45 per cent in October. Corresponding NFC term deposit rates for the euro area stood at -0.34 per cent.

² Overdrafts include revolving loans and extended credit card debt.

Note 1:

Interest rates and new business volumes are collected from credit institutions with a significant level of lending or deposit business with households or non-financial corporations (NFCs). The sample is monitored to ensure compliance with ECB Regulation.

Monthly *Retail Interest Rate Statistics* in Tables B.1.1 to B.2.2 cover all <u>euro-denominated</u> lending to, and deposits from, households and NFCs in the <u>euro area</u>. New business is defined as any new agreement during the month between the customer and the credit institution. This agreement covers all financial contracts that specify the interest rate for the first time, including any renegotiation of existing business (excluding automatic renewals). These statistics are compiled under ECB Regulation and are comparable across the euro area.

Quarterly *Retail Interest Rate Statistics* in Table B.3.1 cover all <u>euro and non-euro denominated</u> mortgage lending in the Republic of <u>Ireland only</u>. New business refers to new mortgage lending drawdowns during the quarter, broken down by type of interest rate (i.e. fixed, tracker and SVR). These statistics are not compiled under ECB MFI interest rate Regulation.

Note 2:

There are a number of factors that can lead to differences between *Retail Interest Rate* statistics and interest rates advertised by resident credit institutions. These include renegotiated loans, the inclusion of home improvement loans, and the underlying statistical compilation methodology.

Note 3:

The retail interest rate statistics are compiled using a sampling method as outlined in the relevant ECB Regulation and Guideline. The sampling methodology is refined and enhanced over time to maintain alignment with relevant international standards and maintain a quality ² Overdrafts include revolving loans and extended credit card debt. sampling approach. In such situations, revised methodology will be applied to historic data to ensure a consistent and coherent compilation of data across time and to allow for time series analysis. The period of revisions will be determined by the impact, feasibility and cost of undertaking the revision. Occasions when methodological revision have occurred are:

- Enhancements to the calculation of the national weighted average interest rates and national total business volumes have been introduced in ECB Guideline (ECB/2014/15) on monetary and financial statistics. These enhancements introduced in the Guideline involve changes to the sampling methods. The changes made contribute to a further harmonization of the data compilation process thus improving cross-country data comparison. The changes apply for reference period December 2014. As a result of these enhancements, data have been recalculated, as per the requirements of Guideline ECB/2014/15. for previous reference periods.
- Changes applied to reduce the maximum grossing factor used in estimating total population data. The changes reduce the potential volatility caused by irregular high grossing factors. The impact of the change is largely confined to new business loans to NFCs, with some minor changes to new business consumer loans. The changes apply from reference period April 2021. Data for previous reporting periods have been recalculated back to January 2019.

Recent data are often provisional and may be subject to revision.
